

## (PALS)SAWTOOTH HUCKLEBERRY RESTORATION

Project Type Integrated forest health project

**Lead Implementer** U.S. Forest Service

Primary Contact None

Project Stage Implementation

**Duration** 2009 - ?

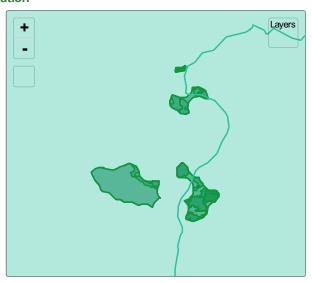

### Integrated forest health project

A project to enhance huckleberry production with a variety of methods for reducing tree canopy cover including lopping, girdling, firewood harvest, commercial timber harvest, and prescribed burning. The Sawtooth Berry Fields are located about 13 miles NW of Trout Lake, WA on the Gifford Pinchot National Forest.
