

Rainwater Wildlife Area Hand Thinning and Slash Piling

Project Type	Non-commercial vegetation treatment
Lead Implementer	Confederated Tribes of the Umatilla Indian Reservation
Funders	Washington State
Primary Contact	None
Project Stage	Completed
Duration	2022

Non-commercial vegetation treatment

The Confederated Tribes of the Umatilla Indian Reservation (CTUIR) and the Washington Department of Natural Resources' Forest Resilience Division developed an agreement to complete 28 acres of precommercial hand thinning and slash piling on the CTUIR-owned Rainwater Wildlife Area. The project's primary objective was to improve forest health by increasing resilience to drought and insect and disease outbreak, as well as the potential for high severity wildfire. Given the value of the Rainwater property as wildlife habitat, a related objective was improving ungulate forage conditions.
